

EDWARD YAN

GTM & AI Automation Engineer

US Citizen

+1 437 838 3010 | yanedward07@gmail.com | yanedward.com | linkedin.com/in/edward-yan

EDUCATION

Western University

London, ON

Civil Engineering and AI Systems Engineering (Double Degree), completed 2 years; on leave

Sep 2023 – Present

- **Scholarship of Distinction** (admission average of 94%).

EXPERIENCE

MEDTECH WRISTBANDS

AI Automation Engineer (GTM Systems)

Sep 2025 – Present

- **Built outbound email infrastructure** using Instantly and ZeroBounce with warmed sending inboxes, list verification, and inbox rotation; also managed ~230K emails over 90 days through GoHighLevel across promotional, reactivation, workflow, and cold campaigns.
- **Designed recapture campaigns** for a 5-rep sales team working a 170K+ historical contact base; roughly 7K recapture outreach emails surfaced ~400 positive reorder-intent opportunities, each routed back to the rep who owned the account.
- **Built EVE, a voice AI receptionist** covering nights and weekends: 531 conversations in 3 months at a 4.78s average response; classifies intent (new order, order status, complaint, general) and hands reps a complete record in the CRM.
- **Built multi-agent website chatbots** for the Canadian and US brands: a receptionist that triages, a flow-based agent that takes stock orders, and an image-aware agent that guides custom designs before handing off to sales.
- **Ran launch and offer experiments:** adding a 10% online-order incentive roughly doubled online orders on a 38K-send campaign; diagnosed a launch with replies and sample requests but zero sales as a broken purchase path, paused sends and flagged the fix to the web team.
- **Built vertical and B2G outbound:** Soccermania reached ~900 cold prospects (sports bars, K-12, sports orgs) for 4 orders in a month; running title-segmented, longer-cadence outreach to Canadian municipalities.

STARSHIP SOLUTIONS (MedTech Wristbands AR/VR venture)

AR & Web Developer

May 2025 – Sep 2025

- **Led the build of 6 live WebAR wristband activations** on 8th Wall (QR scan, wristband recognized, AR plays on the customer's phone) for food and beverage promos, event coupon drops and sponsor messaging; featured in 8th Wall's official blog (Sep 2025).
- **Built the company website on Webflow** and field-tested activations at events, iterating on marker reliability under outdoor lighting.

PROJECTS

yanedward.com, portfolio

React, Vite, Tailwind, Vercel

- **Designed and shipped** my portfolio with case studies of each system above, built with AI-assisted development and Git.

FlexTask, two-sided student task marketplace

React, TypeScript, Supabase

- **Built end to end** with identity verification and Postgres row-level security; shelved when the cold start proved harder than the engineering.

LEADERSHIP & ATHLETICS

Western Cue Club, Co-Founder & Co-President

Jan 2025 – Present

- **Grew the club** to 80 members in its first semester and 130 by year two on a ~\$2K budget; ran tournaments including a 22-team doubles event.

Western Varsity Badminton

Sep 2023 – Apr 2025

- **Competed** on a 16-player roster that placed 4th at OUAs and 3rd at U Sports Nationals; previously assistant coach at Tan Boon Heong Academy (Malaysia).

SKILLS

GTM: outbound infrastructure (domains, warmup, deliverability, list verification), sequencing and A/B testing, customer reactivation and nurture campaigns, campaign automation, intent-based routing, CRM pipelines

Tools: GoHighLevel, Instantly, ZeroBounce, Zoho CRM, Webflow, 8th Wall; learning Clay and HubSpot

AI & Code: voice and chat agents, prompt design, Python, JavaScript/TypeScript, React, Git (AI-assisted development)

Languages: English, Mandarin, Indonesian, Malay
